SECURITY INFORMATION

Via Air Pouch

Dispatch No.

Date: 15 August 1952

To : Chief,

From : Chief,

Subject : General - Administrative
Specific - Power Frequency Meter.

1. desires to know whether can procure a reed-type frequency meter which will read frequencies in the neighborhood of 50 and 60 cycles. He finds such an instrument a great help in adjusting small AC generators properly.

2. He suggests the dual range instrument such as used to be on the panel of International RD-6-A generating sets might be satisfactory, but any instrument or pair of instruments that would permit him to read power line frequencies between 48 to 52 cycles and 58 to 62 cycles in quarter or half cycle steps at 110 volts would suffice.

3. These items are procurable locally only on order from the USA with delays of 3 to six months in shipment.
